

Bellacide™ 355

Cooling Tower Microbicide

Form: Liquid

Color: Colorless

Odor: Slight

pH: 6 - 8

Solubility (in water): Soluble
(in mineral spirits): Insoluble

VOC Content (% by weight): N/D

Flash Point (ASTM D-7821): N/D

Specific Gravity: 1.0 g/cm³

Density: 8.35 lbs/gal

Storage Stability (at 70°F): 1 year

Ingredients

C.A.S. #

Water.....7732-18-5

Tributyl Tetradecyl
 Phosphonium Chloride81741-28-8

| • | Bacterial fouling |

DIRECTIONS: Initial Dose: When the system is noticeably fouled, add 26 to 77 fluid ounces of BELLACIDE™ 355 per 1000 gallons of water contained in the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 13 to 38 fluid ounces of BELLACIDE™ 355 per 1000 gallons of water contained in the system. Repeat as needed to maintain control. Heavily fouled systems must be cleaned before treatment is begun. See label for further applications (pulp, paper & paperboard mills, and enhanced oil recovery) dosage rates.
