

POND DYE

Concentrated Blue Water Dye

Form: Liquid

Color: Blue

Odor: None

pH: N/D

Solubility (in water): Soluble
(in mineral spirits): Insoluble

VOC Content (% by weight): 0%

Flash Point (ASTM D-7821): N/A

Specific Gravity: 0.99 g/cm³

Density: 8.26 lbs/gal

Storage Stability (at 70°F): 1 year

Ingredients

	<u>C.A.S. #</u>
Water.....	7732-18-5
Dye.....	Mixture

Ideal For Use In...
<ul style="list-style-type: none"> • Golf Course Ponds • Sewage Lagoons • Municipal Ponds • Decorative Fountains • May be used for coloring herbicide and insecticide spray solutions.

DIRECTIONS: One gallon of POND DYE will impart visible color to approximately 10,000 gallons of water. The addition of POND DYE may be increased if more of a visible blue color is desired.

NOTE: To determine the gallons of water in a body of water, measure the body of water in feet. Calculate the surface area in square feet, and multiply by the average depth in feet. This number multiplied by 7.48 (gallons/ft³) will give you the number of gallons in the body of water.

1 acre-foot of water = water measuring 208.7 ft. long by 208.7 ft. wide by 1 foot deep.

1 acre-foot of water = 43.56 cubic feet of water.

1 cubic foot of water = 7.48 gallons of water.

1 acre = 43,560 ft².
