CITRA-SOL Natural Emulsifiable Degreaser

Form: Liquid

Color: Clear, Colorless

Odor: Citrus

pH: N/A

Solubility (in water): Emulsifies (in mineral spirits): Insoluble

VOC Content (% by weight): 95

Flash Point (ASTM D-7821): 122°F

Specific Gravity: 0.845 g/cm³

Density: 7.05 lbs/gal

Storage Stability (at 70°F): 1 year

<u>Ingredients</u>	<u>C.A.S. #</u>
d-Limonene	5989-27-5
Linear Alcohol Ethoxylate	34398-01-1
1-Undecanol	

Use as...

Drain Maintainer Use undiluted. Sewage Deodorizer Use at a 1 to 100 dilution. Garbage Truck Deodorant Use at a 1 to 1 dilution. Cosmoline Remover Use undiluted. Laundry/Carpet Pre-Spotter Use undiluted. Gum/Wax/Tar Remover Use undiluted.

DIRECTIONS:

SEWAGE TREATMENT: To neutralize problem odors, use CITRA-SOL undiluted at a rate of 1 to 5 parts per million of untreated waste. This remarkable degreaser/deodorant will not harm metal, concrete or plastic. It will not affect the natural bacterial digestive process. Use a 2% solution for daily spraying of filter beds.

DRAINS: Pour 1 pint of concentrate into drains. Allow to remain 2 to 4 hours and flush with water. Routine treatment programs with regular additions of CITRA-SOL added weekly will significantly reduce the grease accumulation in grease traps and drains.

DEODORIZING: Use 1 gallon of concentrate diluted with 100 gallons of water. Apply 100 gallons of spray mixture to 2000 to 3000 square feet of garbage dumps. Apply diluted 1:1 with water for instant deodorizing in refuse trucks, restrooms and offices.

GENERAL CLEANING: Use full strength to remove gum, wax and tar from carpeting. A solution of 1 to 2 oz. per gallon of clean water is ideal for cleaning and deodorizing walls and floors in schools and offices.
