**NET WEIGHT:** 15 oz. (425 grams)

# Glimmer

FOAM CLEANER & PROTECTANT

GLIMMER is an excellent cleaner and protectant for use on a multitude of surfaces. It works great on rubber, plastics, leather and vinyl. It sprays out into a thick, rich foam that clings to the surface and immediately begins deep cleaning and removal of dirt, grime, grease and oil. It also provides long-lasting UV protection from the harmful rays of the sun. It quickly cleans surfaces leaving behind an incredible shine that lasts much longer than ordinary protectants. It leaves behind a shiny protective barrier that helps prevent fading and cracking on tires, upholstery, plastic and leather surfaces.

**WARNING:** Contains gas under pressure, may explode if heated.  
**STORAGE:** Protect from sunlight. Store in a well-ventilated place.

**INGREDIENTS/CAS#:**

Propane/Isobutane/N-Butane (68476-86-8); Sodium Nitrite (7632-00-0)

**KEEP OUT OF REACH OF CHILDREN:**

Refer to SDS for further information.

**SUPPLEMENTAL INFORMATION:** 2.46007% of the mixture consists of ingredient(s) of unknown toxicity.

**DIRECTIONS:**

Always shake can well before use and never apply to what one would deem an overly muddy, soiled surface. Product will perform at its best when applied to a pre-cleaned or semi-clean surface.

1. When applying to tires, spray 6 to 10 inches from substrate and let the product work. No wiping is necessary. (Take care to not apply to brake rotors, drums or motorcycle tires. Always spray in a place where brake dust run-off is not a concern (i.e. stained driveways).
2. When applying to vinyl, plastic or rubber substrates spray 8 to 10 inches from surface taking care in not over applying the product. Let the product soak into the substrate for roughly 20 to 30 seconds before following with a soft cloth. The foaming action will allow for the grime to be floated away and leave only shine behind. Spread the product over the surface until desired gloss level (buffing) is achieved. Re-apply as needed to improve gloss level.
